An Argus Specialist Publication

Every week: your best buy for software reviews and listings

No. 69  
July 3-9, 1984

45p

**WIN**

Beach-Head and sweatshirts from **U.S. GOLD**

Software reviews for: Spectrum, Commodore 64, Dragon, BBC, Sord, TI-99/4A

Great games to type in for: Commodore 64, Oric/Atmos, VIC-20, BBC/Electron

**PLUS** news, U.S. Scene, your letters, latest software charts

## Big names fight piracy

Big names in computers have got together in a powerful anti-piracy group. Members plan to lobby MPs for a change in the law to make it easier to prosecute pirates and counterfeiters. Among the organisations which belong to the Federation Against Software Theft are: Guild of Software Houses, Computer Trade Association, Guild of Software Distributors, British Computer Society, Computer Retailers Association and Computing Services Association.

*Continued on page 5*

## Queue for Amstrad

Queuing started at 7.30am when the first Amstrad computers went on sale at a central London store. And, as soon as the doors opened, sales were at the rate of 20 an hour, said manager William King. He said: "It's just gone berserk. I wish we could have a day like this every day." His was the first of nearly 400 branches of Rumbelows to stock the new computer. Sales were split half-and-half between the green screen model at £230 and the version with a colour monitor which costs £330.

# WIN! THIS FABULOUS GOLDEN TREASURE, THE FAMOUS GOLDEN JEWELLED HARE OF 'MASQUERADE' OR £30,000

WITH  
HARERAISER  
FROM  
HARESOFT

*HARERAISER*, is an intriguing puzzle of animated graphics and text produced in 2 parts, purchasers of which will have the necessary information and be eligible for entry into a competition to discover the location of the Hare. To avoid desecration of the countryside, the treasure has not been buried, the winner merely having to pinpoint its location, to claim this superb prize. Part 1, *Hareraiser (Prelude)* is on sale NOW. Part 2, *Hareraiser (Finale)* from mid-September. (Both parts can be ordered on one application). This is a **UNIQUE** opportunity, you or your family could solve this adventure puzzle and win this beautiful treasure. Be sure of your participation. Order NOW and avoid disappointment. Finders keepers!

## Watch out, Europe!

Sinclair is soon to hit Europe. The company has plans to establish operations in Frankfurt, West Germany in June, and Paris, France in the autumn. This is the first step for Sinclair into the European computer market. The company is concentrating on implementing local language software, which Sinclair believes is crucial to success.

Charles Cotton, Sinclair's overseas business manager, said: "Our strategy aims to consolidate our leading position in the European markets and increase both our sales and market share."

Sinclair is also doing very well back home, according to a report by independent market research company Audits of Great Britain (AGB) who surveyed 25,000 households.

Sinclair reportedly scooped 43 per cent of the market for the first quarter 1984. Total Sinclair quarterly sales through all outlets was 215,000 with the Spectrum remaining the most popular model and taking a 36 per cent share.

AGB's findings are also mirrored by the latest Gallup Marketing Direction quarterly survey of 10,000 people over the age of 16 in the UK. The total Sinclair base now stands at 2.35 million units, which is 10.7 per cent household penetration.

*Sinclair Research, 28 Stanhope Rd, Camberley, Surrey*

## Briefly

Cityfighter has now been converted for the Commodore 64. The game, from Choice in Northern Ireland, now has additional extra features. These are music while loading, a demo, and the possibility to use either joystick port. Price: £6.95.

*Choice, Choice Buildings, 75 Belfast Rd, Carrickfergus BT38 8PH, N Ireland*

□ □ □

Hewson Consultants has adapted its 3D Lunattack for the Dragon 32. This makes the Seiddab series complete for the Dragon, and the Spectrum version of 3D Lunattack is reportedly the most successful of its trilogy. Hewson has also modified its Heathrow ATC for the Commodore, and added extra features, such as Concorde landing. Both games cost £7.95.

*Hewson Consultants, 56b Milton Trading Est, Milton, Abingdon, Oxon OX14 4RX*

## Queue

*From front page*

And Mr King, who has been with Rumbelows for 12 years, said the fact that the computer included a monitor was a big selling point — buyers did not need the use of the family TV.

He reckoned that every buyer, some from as far away as Cheshire, also left with two items of software.

Container ships are on the way from Korea with more supplies for Rumbelows, Dixons, Boots, Comet and mail order houses.

Amstrad's sales director Dickie Mould said: "The initial interest at the time of the launch was, perhaps, predictable. But this level has been maintained and I am called every day by retailers who want to be supplied."

"Our initial run of 200,000 units for 1984 is already underwritten by our nominated stockists and we are urgently reassessing our budgets for 1985, when we anticipate bringing in 600,000 units."

● The first Amstrad peripheral will be a dot matrix printer, made by Seikosha and costing £199.

*Amstrad Consumer Electronics, 169 King's Rd, Brentwood, Essex CM14 4EF*

## Piracy

*From front page*

Member companies include: IBM, Hewlett-Packard, W. H. Smith, Virgin Games and Websters, the software distributors.

FAST hopes to have the same legal success as the Federation Against Copyright Theft, set up by the video industry.

Ronald Robertson, a member of FAST's management group, said that as well as pressing for legislative change, FAST wanted to publicise the legal protection that already existed.

Mr Robertson is the legal advisor to the CAP group, which specialises in business systems, and he said business software was also being hit, particularly by lookalikes.

Clive Digby-Jones, secretary of the Guild of Software Distributors and managing director of Websters, said: "We want to make people aware that if piracy goes on it will reduce the amount of new and good software."

*Federation Against Software Theft, Chancery House, Chancery Lane, London WC2A 1QU*

First in the queue — Victor Harris, of Swanley, Kent, leaves Rumbelows with his Amstrad computer

# You could be on our pages

We welcome programs, articles and tips from our readers. If you feel that your work meets our standards, please submit it to us for consideration for publication.

● Programs must always be sent on cassette. Listings are helpful, but not necessary. Check carefully that they are bug-free. Include details of what your program does, how it works, variables you have used and hints on conversion.

● Articles on using home computers should be no longer than 2,000 words. Don't worry about your writing ability — just try to keep to the style in HCW. Articles most likely to be published will help our readers make better use of their micros by giving useful ideas, possibly with programming examples. We will convert any sketched illustrations into finished artwork.

● Tips are short articles, and brief programming routines. Your hints can aid other computer users.

All submissions will be acknowledged and the copyright in such works which will pass to Argus Specialist Publications Ltd will be paid for at competitive rates.

Keep a copy of your work and include an SAE. Label everything clearly and give a daytime and home phone number if you can.

All work for consideration should be sent to:

**Paul Liptrot, Home Computing Weekly, No.1 Golden Square, London W1R 3AB**

## Ads on your screen

This is Olympics year, as we all know. Although the Olympics may be suffering major problems, the computer games based on the Olympics are doing very nicely, thank you.

Now, when you simulate the track scenes on your micro, the atmosphere may seem that much more realistic. Micro Olympics from Database now carries advertising, just as you see on your TV screen when you watch the athletics.

Database has accepted advertising from software houses and while you are striving to compete with the computer, you will see famous names on the hoardings.

Micro Olympics runs on the BBC and Electron. As you compete, you will be striving to better the world record, which the computer achieves each time. Database claims that the program is accurate in the times and distances, ranging from the 100 metres to the hammer throw. Price: £5.95.

Database, Publications, Europa Hse, 68 Chester Rd, Hazel Grove, Stockport SK7 5NY

## Can Kanga win?

Here's a game from down under — well, at least the idea is. It's Kosmic Kanga from Micromania. Now out in the shops, it's a multi-screen arcade-style action game, in which Kanga leaps about scoring points by bouncing on bonuses. Our Kanga throws a good punch too, and he scores points by throwing them at the enemy.

Kosmic Kanga features scrolling animated graphics and over 40 different types of bonuses and enemies.

Available now for the 48K Spectrum at £5.95, the Commodore 64 version will soon be out too.

Micromania, 14 Lower Hill Rd, Surrey, KT19 8LT

## Make use of your micro

Moder-80 is now out for the Spectrum. The package includes an "easy to use" mini-assembler and a disassembler. Seven Stars claims it's Micro-drive-compatible and provides

low and high memory versions for co-resident use with a symbolic assembler. It also features a single step (trace) mode with a disassembly.

The disassembler can output to screen or printer, according to Seven Stars, and the non-symbolic assembler accepts all standard Z80 mnemonics plus DEFB, DEFW and DEFW for strings and data. It can also handle decimals, hex and ASCII in simple expressions.

The package comes with a manual and costs £6.95. Seven Stars, 15 Gloucester Av, London NW1 7AU

## Briefly

Enter the death race which spans the four seasons in Audiogenic's Burnin' Rubber for the Commodore 64. You're a tough character: your one aim in life is to run all other competitors off the track. Your opponents are as ruthless as you are — you must face the indestructible Tank Cars and cunning Deathmobiles. If you're quick enough, you can fly over obstacles. Cost: £6.95.

Audiogenic, PO Box 88, Reading, Berks

## Our winners

There were eight differences in our Vortex competition.

These are our 45 winners:

Tony De Palma, Brockley; Mr W T Sillence, Herts; Mr M E Lincoln, Merseyside; Colin Sheldrake, Wallington; Gary Bird, Newport; Bryan Greenhall, Manchester; Jonathan Lunn, Wakefield; Keven Jackson, Wilts; V P Owen, London N12; Carl Horsfield, Merseyside; D Nash, Grays; Steven Cox, Shrops; Dennis Richards, London N4; Mr P Hughes, Cheshire; Mr R Lines, Birmingham; Mr J Lancaster, Midlothian; G Shackleton, W. Yorks; Tim Prince, Cumbria; Simon Webster, Cambs; Edward Whitehouse, W. Mids; Mr French, Northampton; Neil Robinson, W. Yorks; Michael Shepherd, Northumberland; Martin Burgess, W. Yorks; Duncan Murray, Cleveland; Mr T A Smith, Tyne & Wear; M Keeton, Doncaster; Alan Mahon, Dublin; David Coyne, Middlesex; Julian Kilburn, N. Yorks; Stephen J Gray, Little Haywood; Mark Pepperrell, Feltham; Kevin O'Byrne, Cleveland; D Watson, Abingdon; Kevin A Mulrennan, Small Heath; C F Kirby-Smith, Bexleyheath; Jon Skipper, Norfolk; Mr T M D Russell, Warminster; A Rose, Humbs; Mr C Dolan, Middx; Steven Ashion, Merseyside; Inderprit Singh Johal, London E12; Steve Amolot, Worcestershire; Peter Fernandes, Ilford; Rona Williams, Upminster.

## More Winners

Here's the solution to our Scisoft wordsquare competition. Horizontal words: Star Reader, Wizard Box, Chemistry. Vertical words: Astromaths, Computer Studies. Diagonal word: Maths part 1.

The 70 winners of two Scisoft titles are: Mr I West, Greater

Manchester; Julie Dawson, Ipswich; Amanda Wilkinson, Adel Leeds; Mark Adkin, Surrey; Andrew Ellis, W. Yorks; Robert G Lane, Brighton; Gavin Alston, Scotland; William Durning, Glasgow; Marcus Prescott, Burton-on-Trent; K W Carr, Clwyd; Sa mrendu Singh, Kent; Nicholas Prosser, Suffolk; Mr N P Powley, Norfolk; Mark Jones, Sheffield; Norman Parkes, Burnley; S J Bates, Basingstoke; K Chua, Birmingham; Mrs R Butler, Liverpool; H Zuchowska, Birmingham; K Jenkinson, Oxon; Shaun Davis, Kent; Steven Neath, Bristol; Calum Macdougall, Argyll; Mr G R Hynes, Northants; M P Botton, Hull; Wendy Smith, Walsall; Mr M Lee, Hants; Marie McNally, Caversham; S Fifer, Enfield; L F Zawistowski, Avon; Anne Wyke, W. Yorks; James Hurd, W. Mids; Robert Kinnaird, Aberdeen; Mr M Stamp, Wilts; John Coldbreath, Hants; Mrs M Barrett, Cambs; Richard Tester, W. Sussex; Chris Hall, N. Ireland; J McKeller Main, Retford; T French, Hants; Yvonne West, Aberdeen; Tracey Booth, Hull; Kim Yarwood, Herts; Kathy Seldon, Sandy; Brian Morris, Rochdale; P R Taylor, Birmingham; Neil Thornhill, Swansea; Mrs C E Grattage, Stoke-on-Trent; Miss I Patel, Birmingham; Mr C Crane, Staffs; Tony V Raven, Dyfed; Mr D Smith, Berkshire; Lisa Skelton, Warwicks; J Alba, London; Paul Kelly, Hornchurch; Mr A Baker, Peterborough; E Roberts, Leics; Simon Campbell, Harrow; Mr M J Hillier, Wilts; David Blaney, N. Ireland; Russell Pearson, N. Ireland; Mr P Foster, Kent; Euan Pearson, Scotland; Martin Earwicker, W. Sussex; J Groombridge, Cambs; Karen Haggerty, Northumberland; Stephen Fortune, Wilts; J D McNeill, Glasgow; Bernadette Brick, Cork.

## And even more...

There were nine differences in our Abrasco competition.

These are the 70 winners who will each receive two tapes from

Abrasco's range: Paul Almond, Cheshire; SSGT James, BFPO 13; James McKillop, Norwich; Mr M J Symonds, N. Yorks; Gareth James, BFPO 15; Mrs P Harris, Kent; Richard Morley, Derby; Sanjiv Abeyasinghe, Penge; Frank Worley, Old Portsmouth; J Durkan, Aberdeenshire; K W Carr, Rhyl; Mark Ansdell, Kent; Lawrence, Tyne & Wear; R Williamson, Kincardineshire; James Blair, Lancashire; Mr M J Fuller, Romford; Mrs L Scares, Maidenhead; L R Whitmarsh, Harlow; Steve Wood, Bradford; Kathleen Armstrong, E. Lothian; Mr A N Smith, Bolton; Mr N C Short, Durkinfield; Gurmukh Nijjar, W. Yorks; Mr M Baker, Enfield; Darren Laskey, Romford; Mrs C Cawte, Hants; David Muir, Ayrshire; Sian Ganderton, Cheshire; Mr A Bryson, E. Kilbride; Miss P Amlani, London NW4; Michael Rhead, Herts; L Young, Sevenoaks; Thomas P Kilroy, Ballina, Co. Wayo; Marc Walby, Pontypool; John Bourne, W. Midlands; Tony Crump, Halesowen; Mr P Hensy, Leicestershire; Mr M G Davies, Parkstone; Paul Ansell, London E5; Mr M Roberts, Deeside; P K Nurser, Fareham; A Winner, Castledawson; Jonathan Gray, Norfolk; Andrew Noel Smith, Birmingham; A P Gerrard, Herts; M Menzies, Co Durham; David Blunden, S. Yorks; Kevin Maloney, Co Down; Mrs K Walton, Cheshire; David Edge, W. Yorks; Robert D Oakes, Herts; K L Sumbler, Herts; Mr M Usher, Edgeley; Mr G A Gowan, Stevenage; Miss N Burrows, Lincs; E Bailes, Harlow; Mr C Dolan, Middx; Jason Taylor, Coventry; J K Lenihan, Dorset; S Long, Abbeydale; F E W Jugg, Cambridge; Iain Redmore, Huntingdon; B Walton, Tyne & Wear; Mr M Payne, Hull; N Ahuja, Middlesex; Simon Teague, Eastbourne; Lee Roberts, Walsall; Mr T J Meakin, Toton; S R Hulme, Cheshire; Alan Howells, Clwyd.

## TWO ESSENTIAL UTILITIES FOR THE COMMODORE 64

### GET THE MOST FROM YOUR DATASETTE WITH HYPERSAVE 64

ONCE HYPERSAVED, YOUR PROGRAMS (BASIC OR MACHINE CODE) WILL INDEPENDENTLY RELOAD AT TEN TIMES THE NORMAL RATE. NO MORE TEDIOUS WAITING!! THIS IS FASTER THAN THE COMMODORE DISC DRIVE! FULL INSTRUCTIONS ARE PROVIDED TO CONVERT YOUR EXISTING SOFTWARE. EACH HYPERSAVED PROGRAM IS COMPLETELY SELF CONTAINED — NOTHING TO PRELOAD. IT WORKS WITH YOUR LONGEST PROGRAMS (UP TO 48K), AND IS SUITABLE FOR ALL PROGRAM TYPES. CASSETTE..... £7.50

### 64-BACKUP

AN ADVANCED TAPE TO TAPE BACKUP COPIER INCORPORATING A SOPHISTICATED HEADER READER. VERSATIVE AND USER FRIENDLY. CASSETTE..... £3.50

HYPERSAVE — 64 AND 64-BACKUP HAVE FEATURES WHICH NO COMPETITOR CAN BOAST, AND OFFER OUTSTANDING VALUE FOR MONEY.

**SPECIAL DISCOUNT** — BOTH PROGRAMS £9.99 PLUS! FREE WITH EVERY ORDER — SECRETS! A GUIDE TO CASSETTE SAVING AND LOADING ON THE CBM 64 CONTAINING MUCH PREVIOUSLY UNPUBLISHED SECRET! INFORMATION.

FAST DESPATCH GUARANTEED. CHEQUE/P.O. OR SAE TO:

**DOSOFT, 2 OAKMOOR AVENUE, BLACKPOOL FY3 0EE**

# SHOCK! HORROR! SCANDAL!

**SHOCK!** CITYATTAK. The seven screen, all action, machine code game. Superb graphics, smooth game play, a tough challenge for even the hardened arcade action addict. Now available on disk.

**HORROR!** The journey of your life . . . or death! ODYSSEY. Described by Popular Computing Weekly as: 'Addictive with superb sound effects. An arcade game worthy of Jeff Minter for its pure speed of action!' Pick of the week (12th - 18th April 1984). Now available on disk.

**SCANDAL!** IT'S ONLY ROCK'N'ROLL. Your chance to succeed where millions of hopefuls fade. To make the big time in 'Showbiz' and show the world that you're a superstar, not just another dreamer. Now available on disk.

 **K-tel** Software is available at:

Larger branches of John Menzies, Boots, and Computer Dealers nationwide.

K-tel Software can also be obtained by sending a cheque or postal order made payable to: - K-tel International (UK) Ltd. At 620 Western Avenue, London W3 0TU. Allow 28 days for delivery.

**TAPE £6.95**  
**DISK £9.95**  
inc. VAT

Get in gear and under starter's orders for an exciting race!

You are the driver of a racing car lapping a circuit. You must eat up all the white dots as you zoom around in top gear.

Keep alert — a white car is completing circuits in the opposite direction to you. You must avoid collision.

The game gets trickier once you have eaten up the dots. You move on to the next screen. The hazards are greater here as the white car has accelerated and is heading for you at an incredible speed!

This is a game to hone down your reactions to a fine edge. Thinking and acting must be instantaneous. Get ready to go!

#### How it works

10-20 instructions  
21-148 set up screen  
150-212 main program  
215-231 see if screen is cleared  
1000-1020 print score and men left on screen  
1050-1100 print score and men during game  
1200-1280 set up user defined graphics

#### Variables

V volume  
S1, S3 noise registers  
H score  
W men left  
L position of car 1 or 2, decides which car  
CV amount added to POKE colour

# Danger: collision ahead!

```

Your life is endangered by the  
white racing car heading for  
you at breakneck speed. Can  
you save yourself? This arcade  
game is by R.H. Boyd

## Mission XK1 Dragon 32 £6.95

J. Morrison (Micros), 2 Glensdale St, Leeds LS9 9JJ

The first thing you notice about this game is the starting music which, although well done, sounds two octaves too low.

It is a version of the space rescue game and you must leave the mothership, dodge the meteor shower and land on the lunar surface. Unfortunately, there are no men to rescue in this version and the purpose of your mission is to collect fuel from underneath the planet's surface instead. Then on the return journey you have the option to dodge or shoot at the meteor shower before you dock with the

mothership again.

That is really all there is to this game and I feel it lacks the enchantment that makes some games compulsive. You have the option of joystick or keyboard control and whilst both are responsive I found the joystick to be easier.

The difficult part of the game is the docking, which is made so by the small area you have to aim for. Far from making the game more exciting I found this detracted from the game's appeal. **D.C.**

instructions	65%

## Cuber Dragon 32 £8

Tom Mix, 41 Truro Rd, St Austell, Cornwall PL25 5JE

A machine code arcade game in which you must help Cuber hop on to each of 28 cubes forming a pyramid to change them into the required colour.

Coloured balls bounce down the screen and the effect they have depends on their colour. If a blue ball reaches the bottom it turns into a viper which moves at random. Landing on this destroys one of your three lives. There is also a nasty piece of work called a Dork which descends at random and changes the cubes back to their original colour. Landing on this creature

gives you a handy bonus score. There are discs alongside the pyramid onto which you can jump and these are safe zones.

Three levels of play; at the start you are shown graphically what to avoid and what is beneficial. There is a short display of Cuber hopping around a mini pyramid.

The instructions on the insert explain the game comprehensively. Screen display is good. Loading was slow but caused no problems. An entertaining and amusing game. **J.E.M.**

## Crash-Up Car Racing TI-99/4A £7

DEJ, from Stainless, 10 Alstone Rd, Stockport, Cheshire SK4 5AH

TI BASIC rarely lends itself to car-race games because of its slow execution speed and poor response to keyboard or joystick input. This program makes a valiant attempt to imitate arcade quality graphics but alas, fails miserably.

You can race against another player or the computer. The graphics display takes quite a time to set up, and has to be redrawn after every completed game. You can select 1 to 99 laps, accelerate and decelerate and speed and fuel are indicated on screen, albeit rather unclearly.

There are four reserve cars at your disposal; you will need them as it is easy to crash on the bends. There is a pit area in which you can stop, although if driving against the computer this will reduce your chance of winning to zero. You can even specify the efficiency of your pit crew.

The documentation makes this program appear more special than it is, and unfortunately this contributes to the overall impression that this is definitely not value for money. **P.B.**

## Tukom's Kingdom TI-99/4A £8

Stainless, 10 Alstone Road, Stockport, Cheshire SK4 5AH

In this arcade/adventure game you take the rôle of a knight from Nige on a quest for the Great Stone, stolen by the Zok Monsters.

The first screen is a maze, with a Jump Spell, door, key and monster. You must collect the key before going through the door at the bottom of the screen. If you get the Jump Spell (by landing on a capital S near the bottom of the maze) you can jump to a random place in the

maze. This action can be carried out only once each time the spell is gained.

Unfortunately there is a bug: the monster sometimes moves over the spell, clearing it from the screen.

In screen two, you enter the dark forest. The only difference from the maze is that the forest has trees, not walls, randomly placed around the screen.

There are many other screens; throughout, your weapon of defence is your sword. **J.J.**

## Bombard Sord M5 £5.95

CGL, CGL Hse, Goldings Hill, Loughton, Essex IG10 2RR

You are the pilot of a plane which is running out of fuel. Your height is decreasing with each pass across the screen. To land safely you must flatten the buildings by bombing them.

You've probably realised this is an M5 version of that classic arcade game. Although the program is written in BASIC-1, the sound is satisfyingly different, the plane looks like a plane and it rumbles across the screen as it should.

The action is relatively fast and I found the game fun, at least for the first few goes. Nice features such as a neat title page, instructions and various skill levels show that quite a bit of thought has gone into the design but ultimately it must be said that this is the type of game published in magazines within two weeks of a new machine's launch. It would never be sold commercially for the more popular machines.

It is sad this isn't the case with the M5 and you must fork out £5.95 for a rather simple, pure BASIC game instead of just typing it in. **S.S.**

**How it works**

- 1 clear screen, set to black, define variables
- 2 check for high score
- 3 set start score
- 11-12 define variables for each segment position of snake
- 13-200 title screen, options
- 210-240 draw screen border
- 250-260 place snake on screen
- 261-264 print obstacles
- 268-269 set up variables for number of pills
- 270-290 randomly position pills
- 291 start timer
- 295-330 detect keys
- 331-380 move snake and detect pills or crashes
- 1000-1280 instructions
- 3970-5020 sound effects

Snaker, as the name suggests, involves moving a snake around the screen, eating pills and avoiding everything else

There's a 30-second time limit to clear each screen and there are more and more pills to each and every screen.

Scoring is on screen and a record is kept of the high score, which is displayed on the title screen. Full instructions are also included in the program.

# Watch out as you guide a snake about

• We have inserted REMs in the program as a guide to the Commodore control characters. These need not be entered.

**Variables**

- D direction of snake
- HI high score
- Sc high score
- A0 to A9 position of each segment of snake
- PL number of pills on screen
- G number of pills remaining to complete screen
- TIS amount of time remaining to complete screen

You've got just 30 seconds to clear the screen in this fast and furious game by Eric Liddell for the Commodore 64

## PiKaDee Software FOR THE COMMODORE TI-99/4A

**PKD1: GRAPHICS CREATOR & SCREEN EDITOR** £5.95  
This highly praised utility program makes the creation of graphics into large screen layouts quick and simple. Commands include MIRROR, ROTATE, INVERT and many more. HCW No. 54 said "A Must For all TI Owners".  
Instructions: 100% Ease of Use: 95% Display: 95% Value for money: 95% Price includes full instructions and 3 sets of demographics.

**PKD2: MUSIC MAKER** by David Martin ★ ★ ★ ★ ★  
**TI-LUDO** by Roy Hollingworth £5.95  
**CHARSET ONE (BOLD)**

Three high quality programs on one tape. MUSIC MAKER is a novel way to play with TI's sound. Notes are entered onto 2 musical staves and can then be edited in different ways. They can be played back with 1, 2 or 3 voices or with an echo. Many commands. Full instructions and demo tape for the included TI-LUDO is a classic version of the classic board game. You can play your friends and/or the computer. 1 to 4 players can take part. CHARSET ONE (BOLD) is a complete ready-to-use character set which will enhance your own programs 100%.

**PKD3: RIVETS!** by John Haworth £4.95  
**(CHARSET TWO (PICA))**  
Arcade action with Rivets! You have to pick up all of the rivets left lying around by your workmates. The boss is timing you so you had better be quick. Beware the banana skins and don't run too quick as it's a long way down to the ground. 5 skill levels. 21 floors. Timer. "This is a must for all game players." CHARSET TWO (PICA) is the second off-the-shelf character set for your own games. Instructions included.

**PKD4: ESCAPE FROM MICA!** by B. Dhooper £4.95  
This has to be the most addictive arcade game yet for your ancient TI 99 4A. You've been captured by the Count of Mica. To secure your release you have to collect valuable items from 3 fields. These fields are guarded by a terrifying monster who eats people like you for dinner!!! The Count has given you 4 Hyperspace pills - use them wisely. This is a very entertaining game with 4 skill levels, animated running, good graphics, sound and a High Score table. Not to be missed!

All cheques, PO's etc. to **PiKaDee Software**  
**35 Parker St PRESTON**  
**Lancs PR22AH**

## Spy's Demise TI-99/4A + MiniMemory £8

Challenge, from Stainless, 10 Alstone Rd, Stockport, Cheshire SK4 5AH

This is the machine code version of the Extended BASIC game, and oddly enough easier to play. You are still at the Ukrainian diplomatic mission in Pyongyang, and you must cross 11 floors nine times, avoiding patrolling guards while building up a coded message — the solution of which could win you some software — and you still use either keyboard or joystick.

This time, however, the guards bounce off the top and bottom floors instead of wrapping round, which makes life more difficult, but your movement

control is far tighter, and when you use the option to pause everything stops, unlike the Extended BASIC version. It is this, more than anything, which makes the game easier and because there is less frustration, the enjoyment is greater.

Although there are really two games here — the on-screen battle with the guards and the code-breaking — the code could easily be obtained in both versions. However, the game would hold your attention and interest in its own right.

The graphic display is very similar to the Extended BASIC version, and shows better than average control of sprites. P.B.

## LUNAR SQUASH RAIDERS

Tom Mix Ltd

CGL, CGL Hse, Golding Hill, Loughon, Essex IG10 2RR

This package consists of three games

Lander is, as you can probably guess, the classic moon landing game. It's badly implemented and worst of all I found it impossible to land.

In Squash you move a bat up and down to keep a ball in court for as long as possible. Every time the ball hits the wall, your score is incremented. No knocking down bricks. Graphics and sound leaves a lot to be desired and the game itself is unoriginal and boring.

In Raiders, you control a

fighter plane moving left and right and shooting down the enemy planes which fly down screen. Although simple in concept, I found this game surprisingly addictive.

Since these are all written in BASIC-I to run in 4K, the graphics and sounds are very crude compared with the cartridge games available. What's more, they are all very unoriginal and, with the exception of the last one, very boring. Although together they only cost half as much as a cartridge, they are of very low quality and can not be recommended very highly. S.S.

instructions	60%
playability	40%
graphics	40%
value for money	40%

## Electron Dragon 32 £8

Tom Mix Software, 41 Truro Rd, St Austell, Cornwall PL25 5JE

This package consists of four subgames for one or two players which must be successfully completed before you can move to the next level.

Each player starts with four lives. Between subgames a selection board is displayed for choice of game. Apparently you can use the right or left joystick although I found I could use the right one.

The four games are: Prachnid, in which you must reach your transporter in the centre of the screen before you are shot or before the time runs out.

Beam Buggy in which your buggy and the computers leave vapour trails. The first buggy to crash into these loses.

Maze in which your tank must try to hit the computers three times before they destroy you.

Force Field in which you are trapped in a cylinder with a collapsing roof. You must shoot your way through before you are crushed to death.

Scores vary for each game. Extra lives are awarded if you reach certain scores.

Not very impressive graphics or games. Loading seemed to take a long time. J.E.M.

# Games, games and more games!

Here are five action-packed arcade games which have been thoroughly scrutinized by our expert reviewers. Read before you buy

## Pengon Dragon 32 £8

Microdeal, 41 Truro Rd, St Austell, Cornwall PL25 5JE

This game for one player has Pengon the penguin travelling through the icy mazes trying to avoid or crush the nasty sea beasts.

There are five skill levels which govern speed of play. You can choose a black, buff or green background.

You must guide the penguin through the ice cube mazes. By using the fire button you can crush the cubes or push them at the nasties to sandwich them between two cubes. I never knew that penguins could be so vicious, but it is a case of you or them.

There are three easily identifiable magic cubes which cannot be crushed but can be pushed together for a bonus of 1,000 points and progression to the next screen.

At 10,000 points you get an extra penguin. The graphics are acceptable but I was disappointed to find that Pengon does not look much like a penguin. The program loaded with no problems but it did take a long time. Despite this I enjoyed helping Pengon in his travels and in his fight against the beasts. J.E.M.

## Galactic Encounter/ Checkers TI-99/4A £6

Stainless, 10 Alstone Rd, Stockport, Cheshire SK4 5AH

Galactic Encounter is a modern version of Othello for one or two players. In the one-player version, the computer takes the rôle of Evil Astex 99, who is fighting you in Sub Quadrant 4A. In the two-player version, player two takes the place of the computer.

The object of the game is to capture the opponent's troops. This is done by moving your troops into galaxies adjacent to those occupied by the opponent. The game finishes when there are no unoccupied galaxies, or if either player has no troops left, or if both players are unable to move.

A clever graphics effect is used to make the troops' eyes and feet move. I assume this is done by constantly changing their character codes.

The second game on this cassette, Checkers, is a variation of the old strategy game of Solitaire, except that the layout used is an 8 x 8 grid, with the centremost sixteen squares left blank.

Stainless is awarding a free program to the person who sends in a solution for Checkers before the end of the year. The prize will go to the best solution.

Good value J.J.

# Unlock Your Imagination

£18.95  
DISC

**SCOPE 64**  
(tape or disc)  
Not just a games designer - this remarkable product will revolutionise programming. Easy to use, supplied with bumper instruction manual - tells you everything you need to know  
COMMODORE 64

£17.95  
TAPE

**SCOPE II** 48K SPECTRUM  
A complete update of the original award winning product - with many Fantastic extras. Sprite routines - Machine code Peek & Poke. Will run your original program totally independently.  
*Original SCOPE owners - send in your old tape & £6.00 for a complete update and new bumper size manual.*

**SCOPE COMPILES TRUE MACHINE CODE TO RUN TOTALLY INDEPENDENTLY**  
Not just a games designer - with SCOPE you can write your own original machine code & publish your own games!

48K SPECTRUM  
**SPECTRUM SPRITES**  
Today's games need sprites. Here's everything you need to know about designing and handling sprites. All in a single pack with full instructions. Handle 8 sprites simultaneously - collision detection. It's all here!

£7.95

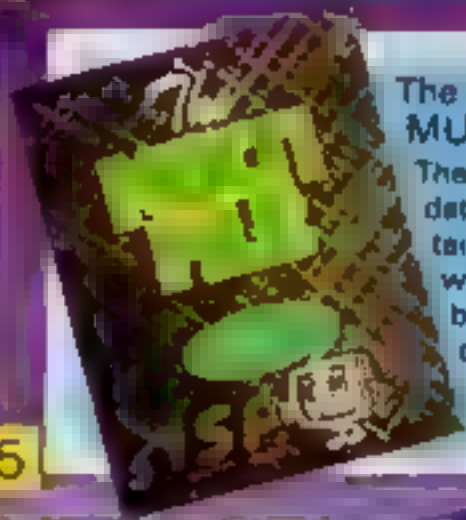

48K SPECTRUM  
**The CHARACTER GENERATOR**  
Another product essential for that unique and professional finish so important in today's programs. Design your own UDG's and complete character sets. 8 x 8 Pixel grid for easy design. Includes 6 specially designed character sets. Compatible with virtually all other machine code software. Big manual tells you all you need to know. Too many extras to list here.

£8.95

48K SPECTRUM  
**The SCREEN MACHINE**  
The definitive screen editor for building and assembling graphic layouts & title pages. Includes many facilities essential to produce really professional screen layouts. Supplied with big manual with full instructions.

£8.95

48K SPECTRUM  
**The MULTIFILE**  
The ultimate user friendly database. You design as many tailor made filing systems for whatever purpose. Each protected by your own secret security codes. Full instructions manual includes FREE TAPE for your first file.

£9.95

**MONSTERS & MAGIC**  
A classic adventure game requiring hard thinking & quick reflexes. Puzzles to solve and monsters to defend all in real time. Being modular - treasure and experience can be carried forward. The first two modules are *Treglith, Stronghold of The Giants* and *Temple of Cushtar King of the Undead*. Enter at your peril

£6.95

**BATTLE PLANET**  
Your mission is to fly into the trench & launch a plasma bolt into the Battle Planet's heart. You must avoid Robot Fighters. Other Robot Fighters will bombard you than the Robot commander joins the fight. *He is invincible! Save Mankind!*

Superb 3-dimensional graphics - only for the most competent player - This game is one of the best.

## Sea Adventure 32K BBC £7.95

Virgin Games, 61/63 Portobello Rd, London W11 3DD

You're in a great big mess here, so you have a lot of work to do to get yourself out of it. Undeterred by threats of pirates, ghost ships and storms you have to find your way home.

The story so far is that your catamaran was holed by killer whales. Fortunately you managed to launch the lifeboat, and the game starts with you drifting in the sea, with the task of returning home.

This fairly straightforward adventure includes a Mode 7 screen picture with each location, and you have the ability to carry

out instructions by using just one key. This is obviously a great help to the inexperienced typist, but any regular adventurer will have typed N and pressed return before he can remember you have to press function key 0 to move north.

I was a little disappointed that the game included no SAVE option, which I thought was standard in all adventures. After completing the adventure I can say that it isn't very spectacular, but I did enjoy the welcome home.

M.B.

instructions	80%
ease of use	70%

## Wheels Sord M5 £5.95

CGL, CGL Hse, Goldings Hill, Loughton, Essex IG10 2RR

You are in the driver's seat of a rally car and must finish a course in the the least time possible. The little character, which barely resembles a car, must be controlled via the cursor keys or joypads. Better key arrangement could have been employed and the insensitive joypads leave you frustrated.

The screen depicts a forest (I think) and track. The car starts from top left and you have to negotiate the 90° turns. Whenever you crash the car, time is lost.

I could see that thought had

gone into the game's design. Nice title page, detailed instructions in the program, various skill levels and so on but the sound is very crude and animation is non-existent. Why use character graphics when the M5 has such powerful sprite graphics?

Many games are very good because they are simple. This game is too simple and offers you no challenge. If it was in machine code and better graphics and sounds were used, it might have been a good game. However, as it stands, I cannot recommend it at all.

S.S.

instructions	40%
playability	20%

## Forbidden Forest CBM 64 £8.95

Audiogenic, PO Box 88, Reading, Berks

This could be another winner from Audiogenic, who seems to consistently bring out only good software.

The object is to fire arrows at various hostile creatures. The wounds inflicted are shown in quite good detail — not for the squeamish.

The scenario is a forest. As you move left or right using the joystick the screen scrolls from side to side. When moving you see the display in a format with near objects moving faster than distant objects.

As time continues the moon rises and falls, screen colours change and stars come out. This is a nice touch which gives the game variety.

The backing music plays throughout. After a while you get tired of this; typical of most games.

To play properly you need a colour television or monitor. When using black and white the shades of grey tend to blend together.

Incidentally, I thought the bug in the screen with the dragon wasn't very original. Quite often the dragon splits into two halves at about the place where the sprite MSB settings occur.

This set of programs is as wide as it is varied. Take your pick and see what you can come up with

## Enigma 32K BBC £9.95

Brainbox, 20 Orange St, London WC2H 7ED

Enigma is advertised as "a new type of computer game" based around a pack of cards. At the start you select which one of five rules to play by, and then determine the nature of this rule by playing the game.

Quite simply you or the computer select a "start card". As the cards are played the computer will inform you whether it has been accepted or rejected according to the rule in use, and presumably its relationship to the start card. Presumably because, during two days, I failed to discover any of the rules.

The only complaint I had about the mechanics was that the order in which the cards were selected and whether they were accepted had to be written on a piece of paper and analysed later. It would have been a nice touch if there had been a printer option to enable the relevant data to be recorded automatically.

Should you be the type of mental masochist who can solve Rubik's cube blindfold with both hands tied then this is the game for you.

## Battle Planet 32K BBC £6.95

ISP Marketing, Hampstead Hse, New Town Centre, Basingstoke RG21 1LG

The inlay shows a never-ending trench seen from the cockpit of a spaceship. Entering the trench are alien craft, and the scene looks set for a space-age shoot out.

From the instructions I discovered that the trench was on the Battle Planet, and your mission is to launch one of three plasma bolts at the planet's vulnerable spot. This reminded me of a well-known film.

You must shorten the distance between yourself and the target, while fighting off robot fighters. If you fail to hit the fighter, only the shield can stop you being bombarded with an energy bolt. After three of these you're dead. Using the shield drains energy and finally ends the game.

Expecting a slight simulation in space I started the game, but instead of looking out from the cockpit my ship was a little white smudge at the bottom of the screen. The alien vehicles were equally boring, and shooting the tiny craft is almost impossible.

Perhaps BBC owners are spoilt but I now expect more colour, excitement and better graphic definition from arcade games.

## ORIC PROGRAMS

No doubt you remember all those TV commercials when they show you the nasty things that can happen to your teeth when you eat too many sweets or don't clean your molars properly.

Well, this game brings all your worst fears about the state of your mouth to life. The magic sword which is your one weapon against the dreaded tooth decay is your tube of toothpaste — and we have no references as to brand. As far as this game is concerned, any toothpaste will do the trick.

### Variables

X,Y plot toothpaste  
 SX,SY plot sweet  
 R decide which way sweet goes  
 N move firing paste  
 S give score  
 D how many times sweet has hit teeth  
 N general use  
 Q music

What you have to do is blast the malevolent marshmallows before they start eating away at your teeth. The first time they are successful in attacking your fangs, your teeth get an attack of jaundice and turn yellow. If you let them near your teeth a second time, you'll lose all your

### How it works

9-140 set up variables  
 150-160 special POKEs  
 600-2000 main loop  
 2100-2190 fire routine  
 3000-3020 add score  
 10000-10140 change teeth colour  
 15000-15100 end?  
 20000-20310 user defined graphics  
 30000-30100 set up screen  
 31000-31100 music

lovely pearls and false teeth would be the only answer.

Press Q to move up, Z to move down and the space bar to fire. For some reason you only see half of a marshmallow when it moves — can you think why this is?

There are 27 UDGs, and if you want to convert this game to the Spectrum, you must omit some of the graphics. The Oric uses an 8 x 6 grid for its UDGs.

The character string controls in line 30 switch the keyboard click off. The other one switches the cursor off. The CHR strings (1-7) plot certain colours in certain places. The Oric's screen is 38 x 26. If your computer doesn't have REPEAT... UNTIL loops, change these for FOR... NEXT loops.

## COURSEWINNER

The Punters Computer Program

COURSEWINNER allows you to use the power of your computer to get the edge on the bookmaker.

- COURSEWINNER contains a database full of detailed information on all English and Scottish flat courses. The ten leading jockeys and trainers, and effect of the draw is detailed for each course.

This information can be displayed on the screen at any time.

- The program analyses these factors combined with the results of the last three outings, starting price and weight carried.

- COURSEWINNER is simple and quick to use, yet very powerful.
- Boxed with detailed instruction booklet.

Price £12.50 all inclusive IMMEDIATE DISPATCH RETURN OF POST

Available for SPECTRUM 48K, BBC B, COMMODORE 64, DRAGON, APPLE II/IIc, ATARI 48K

## POOLSWINNER

The Ultimate Pools Prediction Program

- POOLSWINNER is the most sophisticated pools prediction aid ever produced. It comes complete with its own massive database.
- Can be used for Scoredraws, Draws, Aways and Homes.
- The database contains over 20000 matches (10 years league football). It updates automatically as results come in.
- The precise prediction formula can be set by the user. This allows development of your own unique method.
- Package is complete with program, database and detailed instruction booklet.

Price £15.00 all inclusive IMMEDIATE DISPATCH RETURN OF POST

## COMPETITION

Win a copy of the brilliant chart topper, Beach-Head, and an authentic American sweat-shirt from US Gold, the distributors of top quality software in this country.

Beach-Head has been widely acclaimed for its vivid 3D graphics and dramatic sound effects. US Billboard magazine voted it the best game on the Commodore for sound and graphics and the all action game has been a constant best seller in the States since it was released last November.

Beach-Head costs £9.95 on cassette and £12.95 on disc.

The scenario consists of a naval engagement followed by tanks landing on a defended beach. The object of the game is to take the enemy fortress of Khun-Lin.

US Gold is a new company, formed in February this year. Launched by Geoff Brown, a former maths teacher and professional musician, US Gold has negotiated a series of licensing deals which enables the company to introduce the best of American software to this country — without the sting of import prices.

"US Gold has selected the very best of American games, and is bringing them to the UK at normal UK prices," said Geoff Brown.

"Because we can choose from so many different companies, we can release only the highest quality. We will have 27 top-ranking American titles on release by Christmas."

"Our company name, US Gold, is really our seal of approval," he continued. "These games are solid gold."

Also in the US Gold range are Zaxxon for the Atari, which was nominated as best arcade game of 1983 in the States, and Dallas Quest, a new release for the Commodore 64 and Atari, available on disc only.

"Other games based on Dallas have been pale imitations of the real thing," said Geoff Brown. "This is a

# Go for gold — win Beach-Head and an all American sweat-shirt from

# US GOLD

100 per cent Dallas production — the Lorimar people, who made the series, did the graphics and wrote the storyline." Here's your chance to strike oil and defeat JR once and for all!

All you have to do to win your own tape of Beach-Head and a US Gold sweat shirt is to find all the US Gold titles in our wordsquare. Go for it!

### How to enter

Study the wordsquare and mark all the US Gold titles you find with a ball-point or semi-opaque felt tip pen. Complete the coupon fully and clearly — if you are a winner it will be used as a label. Send wordsquare and coupon to us.

**Important:** write the number of titles you found on the back of the envelope.

Send your entry to US Gold Competition, Home Computing Weekly, No. 1, Golden Square, London W1R 3AB. Closing date is at first post on Friday July 20, 1984.

Senders of the first 50 correct entries opened at random will receive Beach-Head and a US Gold sweat-shirt. Remember to specify your size (small, medium or large) on your entry coupon.

The prizes will arrive from US Gold within 28 days of the publication of the issue containing the results of the competition.

## U.S. SCENE

# It's playtime — with your video toys

I don't know if I like the implications of this, but, as Mr Spock would say, they are certainly fascinating. The well-known software firm, Epyx, is bringing out a computer video game based on America's best selling fashion doll, Barbie. Children (presumably) will be able to dress Barbie, change the colour and style of her hair and create different clothing outfits, just as they could if they had the "real" Barbie doll.

Along the same lines, Epyx is in the process of developing another computer video game based on Mattel's Hot Wheels toys. Kids will be able to design their own cars, selecting features such as body colour, chassis style, tyres, wheels and seats. And as if that's not enough, the same firm is also planning to bring out yet a third similar game. Based on the G. I. Joe (Barbie for boys), kids will have the opportunity to outfit the video soldier and send it into combat against non-human enemies.

Epyx is planning to market these three games under the banner of Computer Activity Toy with an initial version available for the Commodore 64, followed later in the year by versions to run on the IBM PC, PCjr., Atari and Apple computers. The units will cost about \$30 each. In one sense, it will actually be cheaper for parents to buy the computer games than the actual toys upon which the games are based, but it seems to me that too much is missing for the games to be considered equivalent to the "real" things.

After all, kids will miss the tactile and manipulative enjoyment of playing with three-dimensional objects. And besides, it's really hard to take that computer with you when you want to play with your toys outside. Not only that, but the whole concept of sharing your toys with friends will be lost, encouraging kids to isolate themselves, and may keep them from developing necessary social skills.

Perhaps I'm just a real conservative at heart, but the whole idea of video toys just leaves me cold. We'll see how these games do in the marketplace, and probably, in years to come, see whether my fears are groundless. Hmmm, I wonder

In search of a different display? Sharp Electronics (yes, those same clever Japanese folks) has recently unveiled a new full-size flat screen display which could ultimately find itself replacing conventional CRTs used in millions of current computer work stations. The unit is capable of displaying a full 80 columns by 25 lines, can display graphics characters as well as text, and does so at a total thickness of less than 1½ inches.

Like a standard CRT screen, the display gives off its own light which overcomes the disadvantage of liquid crystal flat panel displays, which require an external source of light in order to be seen. Although no price has been set, Sharp indicates that samples are available immediately. The displays are capable of a 600 by 200 resolution, which is compatible, not by accident, with the resolution of the IBM PC. The units are reported to have good contrast and brightness.

Sharp is very enthusiastic about its new product, indicating that the company expects its initial orders to come from a virtual Who's Who of the computer industry. I know that they have been working on this product for some time now, years in fact, so if they are ready to release it, I am certain that it will do the job. We'll just have to wait to find out whether it will be able to compete on the basis of price.

Out of room again. See you next Tuesday.

Bud Izen, Fairfield, California

## SOFTWARE FOR SPECTRUM AND ZX81

**48K SPECTRUM**  
Day of the March £5.00  
Fascinating and realistic simulation of an entire football season. Name your own teams if you wish (English league provided on cassette). Rate each team from one to nine in various success categories such as attack, defence, manager etc. Watch the season unfold, includes knock-out option.

"Ball by Ball" £5.00  
Simulates a test match series of one day international series. Set up your own teams and pool of players (England v Australia provided). Rate each player's capabilities as batsman and bowler on a one to nine scale or qualities such as talent, effort etc. Pick your team and play the match. Electronic scoreboard shows progress of a match. Full supporting score card and series averages.

Here is a selection of titles still available for ZX81. Send a 10p forillus. and catalogue. These are the ZX81 equivalents of the Spectrum programs described above. Although similar in concept, the specifications fall short of the descriptions given for the Spectrum.

### AVAILABLE FROM LEADING DEALERS NATIONWIDE

## Moneybox Dragon 32

Harris Micro Software, 49  
Alexandra Rd, Hounslow,  
Middx TW3 4HP

If handling your money is a  
problem then this could be the  
program for you

Written to a very high  
standard, it offers you the ability  
to handle up to 100 cassette files,  
each one having up to 99  
"periods" with 100 transactions  
per period and 50 "accounts".  
These accounts allow you to keep  
full details of how much money  
is going where and you can even  
change the account titles to make  
it completely personal.

You do have to have all the  
details at your fingertips as you

use the program but it's far  
easier, though not necessarily  
quicker, than trying to do all this  
on paper. If you need summaries  
the printer routine can provide  
all the detail you require

A very good feature is the  
extensive error trapping and the  
use of prompts to tell you what  
type of input is required in each  
field. The only problems I have  
found are the program's inability  
to report file loading errors and  
abort in a reasonable manner  
and the usual one of finding  
enough money to work upon!

Quickdraw is another on-screen  
painting package. It has all the  
usual features, e.g. the ability to  
SAVE and LOAD screens to and  
from tape or disc and to dump  
the finished work of art to a  
printer

Quickdraw makes good use of  
the Beeb's function keys,  
providing such facilities as  
triangle, circle and quarter circle  
drawing. A function key strip is  
provided with the instructions.

The Mode 1 screen is divided  
into two distinct areas. The top  
three lines provide information  
regarding the current cursor  
position and also the drawing

mode in use, e.g. Move, Draw,  
Triangle etc. This facility is very  
informative but unfortunately  
this information is also dumped  
to the printer during the printing  
of the picture. On the subject of  
printing, the user must provide  
his own screen dump routine and  
one line of the program amended  
to call this routine

Overall, I found Quickdraw  
easy to use and capable of  
producing some quite detailed  
displays. Do consider this  
program if a general purpose  
artistic package is what you  
require

## CHARACTER GENERATOR FOR SPECTRUM £8.95

ISP Marketing, 15a Castons  
Yard, Basingstoke, Hants

If you didn't already know,  
character generators let you  
design graphics on a displayed 8  
x 8 grid, place them on your  
chosen keys and SAVE to tape.  
Loaded back with your program,  
the usual POKE and DATA lines  
become redundant, saving time,  
effort and memory. Here you  
can also design an alternative  
character set.

A generator came for free on  
the Horizons tape and magazine  
listings for these and alternative  
character sets are everywhere. So  
why would you need this? Six  
pre-designed alternative sets on  
side b might have been useful but  
copyright is claimed — a surprise  
to other houses, which have been  
using them for years, and the  
printers who originally designed  
the type faces.

The program is mainly in  
BASIC and poorly designed.  
You are forced to go through the  
instructions every time to reach  
the grid screen. Selection is by  
INPUT/ENTER instead of a  
keypress. And there's no easy  
exit to the menu on error. The  
UDG option, by allowing  
alternative set display for  
modification, renders the  
character option superfluous.  
This badly needs a double grid,  
with a display of the original for  
comparison. Altogether,  
unworthy of the publishers of  
Scope and a ridiculous price.

# Take your micro seriously

Use these programs to  
broaden your horizons.  
Whether you want to design  
games, handle your finances  
or define keys, there's  
something for you here

## Key Definer and Character Generator

£5.95 BBC £0.95

G. Soft, 18 Melbourne Rd  
Walthamstow, London E17 6LR

This package consists of two  
programs. First we have a  
function key defining program  
— to be honest this is very poor.  
The average BBC owner could  
write a better program during  
his/her first week on the  
machine. As an example, one of  
the more technical key  
definitions actually allows the  
user to LOAD or SAVE cassette  
based programs at the press of a  
key!

The second offering is a  
character definer. This program  
is slightly better than the first,  
but I imagine it would probably

have been rejected had it been  
submitted for publication in a  
magazine.

The program only allows  
definition of single characters  
and is unable to define  
multicoloured characters.

Characters are defined by  
moving a cursor around an 8 x 8  
grid of asterisks using the cursor  
keys. Usually when using a  
character definer the cursor is  
moved to the required position  
on the grid and the pixel then lit.  
Not in this program. Every time  
the cursor is moved onto a new  
square the pixel is automatically  
lit, so you spend most of the time  
erasing unwanted pixels.

## SCOPE 64 £17.95

ISP Marketing, Hampstead  
House, New Town Centre,  
Basingstoke RG21 1LG

Available on cassette or — at £1  
more — on disc, Scope comes in  
a video-type box with a smart  
spiral-bound manual, and  
describes itself as a games  
designer. I'm not too sure what  
that is.

This is really a new language  
and compiler. It enables you to  
write sound and graphics  
routines which can be compiled  
into machine code and then run  
independently of the Scope

interpreter.

The Scope commands cover  
sound, low resolution graphics  
and sprites. High resolution  
graphics aren't supported, which  
is a great shame. The commands  
are written in BASIC REM state-  
ments. Command words are  
similar to those used in BASIC,  
but the structure of the language  
seems to be closer to that of  
assembler.

Scope provides an easy  
method of writing machine code  
routines to speed up the  
operation of BASIC programs,  
but its limitations would make it  
difficult to use for writing a  
complete program of any  
complexity. Only integer  
variables are supported — no  
strings — and mathematical  
functions are limited to addition  
and subtraction.

An interesting utility, and one  
that's well worth looking at if  
you don't want to bother  
learning machine code.

# ANIROG

**3 NEW  
TURBO 64  
GAMES  
£6.95  
EACH**

## PETCH

### Petch

The wonder penguin is engaged in a desperate search for diamonds hidden in a maze of ice cubes, harassed and chased by his arch enemies Snowball and Snowbox. His chances of survival are slim. Six levels of skill with two player option.

### House of Usher

Dare you enter the House of Usher. Behind each locked door of this nine room mansion a different style of arcade action awaits you.

### Ice Hunter

Ice hunter needs special ice blocks to build an igloo unaffected by the arctic sun. He has found the source of the blocks in a multi level cavern, but can he outwit the grim inhabitants — the dragons, sea lions and vicious birds and float the blocks down the river to construct his dream home. Six levels and two player option.

## ICE HUNTER

Teach young children to count at the same time as making them aware of computers and introducing them to the keyboard.

In this game the child must count the number of mice which are generated at random on screen. Each correct answer allows the random number generator to produce larger numbers.

Your pupil's score will be recorded, as will high scores. There is also an option for turning off the sound, if it begins to grate on your nerves.

#### How it works

40 disables break  
60 turn on sound  
70 turn off cursor  
80 error trapping  
100 disable escape  
110 define characters  
120 define sound envelopes  
130 give instructions  
140-150 set variables  
160 call main game  
180-370 define user graphics  
380-420 define envelopes  
430-520 draw board  
530-560 draw mouse  
570-640 draw cat at location X%, Y% in colour Z%  
650-680 draw cat in correct location  
690-820 graphics  
830-1080 win procedure  
1090-1150 end of game  
1160-1180 error trap  
1190-1380 instructions  
1390-1580 lose game  
1590-1830 main game control

#### Variables

X%, Y% co-ordinates for screen graphics  
S% number of animals (answer)  
M% your score  
N% high score  
T% random number  
number% your guess  
C%, D% control variables

**Develop children's numerical skills with this program by Steve Lucas**

# How many

#### Hints on conversion

Converting this program to run on other systems would be very difficult but the following hints should help

- Replace all REPEAT UNTIL loops with conditional GOTOs
- PROCedures will need to be replaced with GOSUB and END-PROCs with RETURNs. Passing variables to the PROCedures will require using LET statements before calling the subroutines
- You will need to generate a board of 12 x 12 squares using the appropriate graphics commands for your machine
- User defined graphics will need to be chosen to suit, as will the sound effects.
